

## Q: How can I insert a reference of a figure or table within the text?

The final and consecutive numbering of figures and tables is generated for each version. As long as users are still inserting and/or deleting images in EMDESK, the system cannot determine the final numbering and sequence of all images. Since it is difficult for the user to refer to figures or tables in the text without knowing the final numbering, we recommend using individual or fixed reference numbers that are written into the caption field.
