Q: How can I renumber my milestones?

On the *Proposal > Work plan > Milestones* (or *DoW > Work plan > Milestones*), you can renumber the milestones by moving the milestone. You can move a milestone item up and down with the up/down arrows in the side list (only available within a Work package). To move a milestone to another Work package you must use the move icon at the right edge.

Optionally, you can number a milestone manually by opening the milestone and typing an individual ID in the field *ID*.

> Please note that the auto-numbering (when moving the item) will not work anymore, when entering IDs manually.
