

How do I End (terminate) a Partner's Participation in the Project?

To terminate a partner's participation in the project, go to [DoW > Contractor > Contractors](#) and look up the relevant contractor in the contractors list. Then open the contractor item with the  button and tick the checkbox *Participation Period* and adjust the partner's participation start and end month accordingly.

Please note that planned efforts and costs outside the partner's participation period will be not taken into consideration any more. You might need to shift affected figures to a valid period.
