

## **Q: Why are some actual statuses of Deliverables or Milestones etc. not always considered in the exported report?**

Exported reports can only provide information from within the selected report period. For example, if you selected to export an Interim Report covering the M01-M03 period, the report will only retrieve the information dated within that period. That means that if the status of a deliverable or milestone was reported outside this period, it will not be considered.
