Support and Help Site – EMDESK

Q: Why is EMDESK not showing me all deliverables of the project?

The reason why you do not see the Deliverables is because you own *Contractor* access rights and you are not assigned to all *Deliverables*.

Please note that a user with *Contractor* access rights can see only the *Deliverables* the users is assigned to. A user is assigned to a *Deliverable* when s/he is in charge for at least one of the preparation statuses of the *Deliverable* defined by the *Coordinator* in **Implementation > Controlling > Deliverables**.
