Visit these help articles if you forgot your [username](#) or [password](#).

## If your account is inactive

Most likely there is a chance your account has more than 3 failed attempts to login, which than locks it. In such an event, you must activate your account by requesting a new password. Please use the “[Forgot password](#)” function at the login page.

In some other cases, your access rights to a project might have been deactivated by the Project Coordinator, so please direct your request to a user with Coordinator Rights.
