

H2020 Proposal Preparation in EMDESK

This page contains important information for the use of EMDESK for project proposals for calls under the European Union Horizon 2020 funding programme for research and innovation (H2020).

EMDESK supports the following **generic** project types in H2020:

- Research & Innovation Actions (RIA)
- Innovation Actions (IA)
- Coordination & Support Actions (CSA)
- SME Instrument Phase 2

Based on these project types you can prepare a H2020 proposal with EMDESK.

Please note that the structure of the above mentioned project types is based on the published H2020 calls and guides for applicants and may be refined further as new data becomes available. **We also welcome your feedback and suggestions**, which you can send directly from the system or to support@emdesk.com.

EMDESK updates its users on any modifications to the project structures. At present, we do not foresee any updates which would result in any related downtime or planned interruptions. Should such circumstances arise, rest assured that we would provide ample advance notice. We recognize the value and importance of your data. As such, EMDESK does a daily backup of all projects and allows you to export your data at any time.
