3.3 Planned Resources Overview (Estimated Staff Effort)

Under **Proposal** > **Project** > **Resources**, you can review the staff efforts in person-months in real-time according to current partner input. Only users with *Coordinator Rights* will be able to see the full **Resources Overview**.

Resources Overview will allow you to see the planned resources (person-month) for each work package and the total number of tasks for the entire project or for a selected partner.

To view the figures for a specific partner, please select the desired partner from the drop down menu *Contractor* (*left panel*).

To view the resources at task level, please click on the

at the Work Package element (left panel).

The person-months are also shown along the project duration per quarter. Since planned resources (person-month) are determined at the task level ($Proposal > Work \ plan > Staff$ Effort) you'll need to select a specific Work Package (left side panel) and then select a particular task and from there to determine the share of person-months for the selected period e.g. quarter through linearly distributing the task's person-months along its duration.
